

Introduction to Machine Learning Calendar

Rauzan Sumara

10/07/2022

Date	Activities
07 October 2022	First labs, course organization is explained, Demonstration: Linear Regression using Python
14 October 2022	The explanation of the project
21 October 2022	Demonstration: PCA, L1, L2, Elastic Net Regression
28 October 2022	The discussion of the project (group has to be decided)
04 November 2022	Demonstration: Classification algorithm using Python (1)
11 November 2022	The discussion of the project
18 November 2022	Demonstration: Classification algorithm using Python (2)
25 November 2022	The discussion of the project (dataset has to be decided)
02 December 2022	Demonstration: Unsupervised Learning using Python (1)
09 December 2022	The discussion of the project
16 December 2022	Demonstration: Unsupervised Learning using Python (2)
23 December 2022	The discussion of the project
30 December 2022	THE WINTER BREAK
06 January 2023	The discussion of the project
13 January 2023	Demonstration: Real-time CNN computer vision using Python
20 January 2023	The Last chance for discussion of the project
27 January 2023	Presentation
